25X1D

ENCLOSURES: Annotated overlay to maps referenced above.

ORR REQUIREMENT NO. RR/HTA/G/R6/56: Furnish a map overlay of certain areas in the vicinity of Parnu, Estonia showing changes since 1944 in settlements, road network, railroads, military installations, airfields and other significant features.

REMARKS:

The enclosed map overlay shows that portion of the requested area that was covered by recent vertical and oblique photography. Since GX photography of most of this area is not available, the recent photography was compared to the referenced maps, which are very accurate in the area covered by the photography.

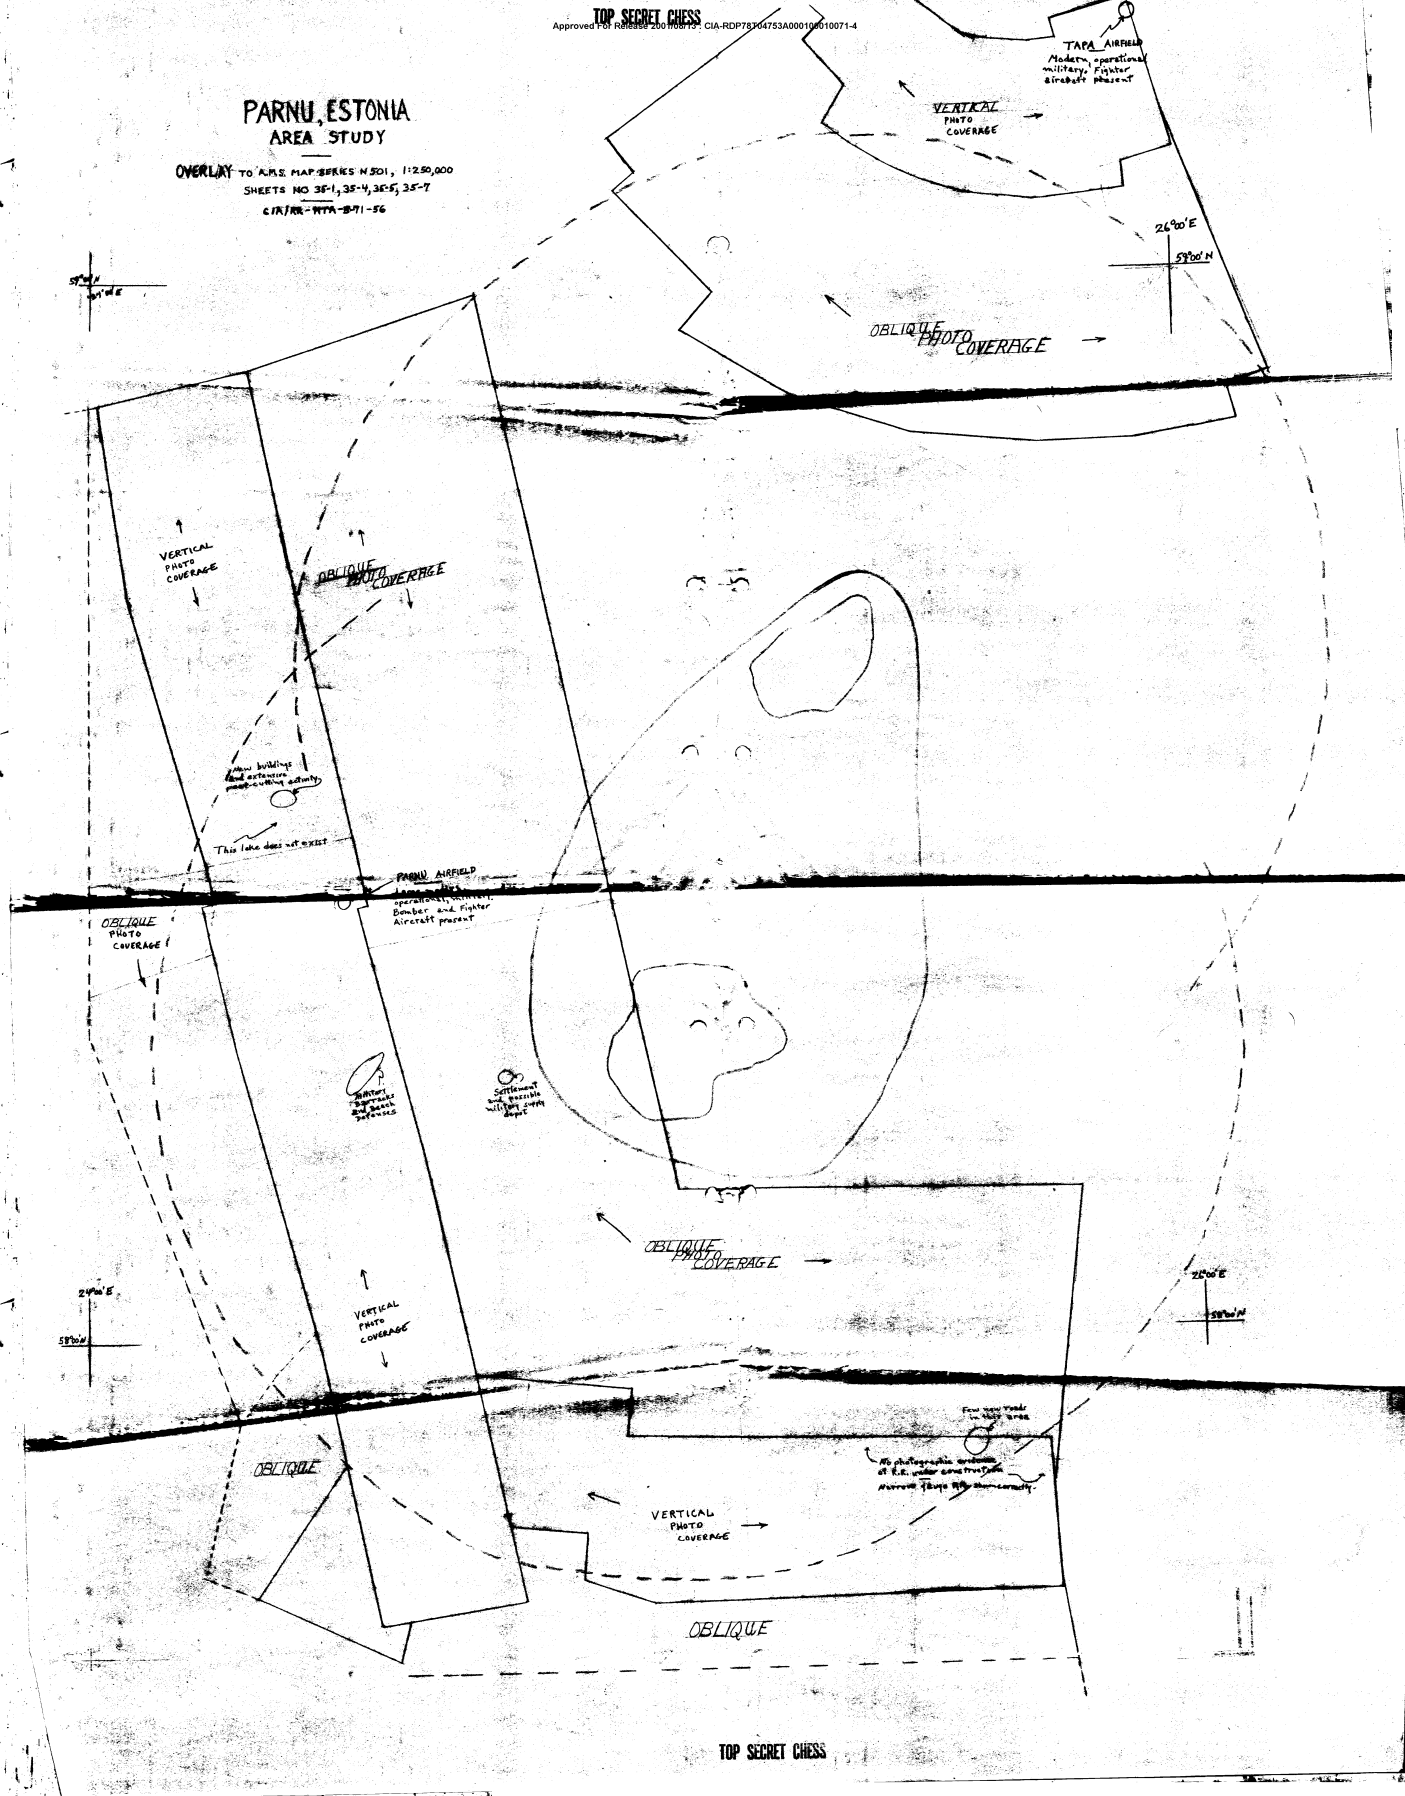

Significant changes were annotated directly on the map overlay. Extensive land drainage systems are evident throughout the entire region. Many areas shown as swamps on the map are now drained and under cultivation. Several minor secondary roads are not shown on this map.

Because of the security nature of this project, the original overlay was delivered to the requester and no other distribution was made.
